INTERIOR DESIGN

For the third year in a row, the editors of Interior Design magazine have curated a selection of designer's spaces for OHNY Weekend. Live, work, play or is it live, play, work? Regardless of priority, this year's designer spaces illuminate work-life integration vividly - creative offices that feel like homes, apartments doubling as workspaces and workshops, so adventurous and creative, you'll never want to leave. The Interior Design series offers OHNY visitors the rare chance to go inside these illustrious designers' places to experience their professional and personal spaces.

Check inside of the front cover for a full listing of participating designers and look for the icon in the top right corner of this page next to site listings to find more information throughout the open access and reservation required sections of the guide, including days and times. Please note that some locations require advance reservations.
